### Objective

I am a fresh Belgium Campus Graduate seeking to land my first role as a Junior Developer or Designer. I strive to write efficient, clean and functional code for software products as well as being intimately involved in designing meaningful aesthetics for the products UX/UI.

### Education

**2022** – Matriculated from  
Glenvista High School

**2023** – 1<sup>st</sup> Year Student at  
Belgium Campus ITversity

**2025** – 3<sup>rd</sup> and Final year at  
Belgium Campus ITversity

### Career Interests

Back-End Development  
Planning & Design  
Project Management  
Product Presentation

### Hard Skills

#### UI/UX design (Figma)

Figma is my design tool choice as it is an industry standard and a platform which allows for my vibrant creativity to be expressed when designing User Experience and Interfaces.

#### Application Development (Java / C#)

For programming and application development, I possess intermediate level experience with programming. This includes building GUIs(WPF & Swing), implementing design patterns (MVC), working with and connecting to databases (MySQL, PostgreSQL) for basic data manipulation.

#### Web Development (React)

In developing web applications, I possess novice level experience in using JSX for the Front-End and MongoDB as a database.

Nevertheless, I am willing to learn and advance my skillset given the opportunity.

### Leadership

I am elected as group leader  
for my current Year End  
Project at Belgium Campus.

### Soft skills

I am a good communicator as I know how to speak up when I need clarity. I prefer and enjoy working in small groups for collaboration. Respect for my seniors is first, then all else follows. Easy to approach and understanding of new ideas/methods are my notable character traits. I am also gifted with natural leadership and presentation skills.
